Comment: As an American, I am deeply troubled by the proposed sale of an American utility to a foreign companies!
This is compounded by the refusal to acknowledge who the whole ownership parties!
I am totally against this sale and intend to participate in any class action brought against this action!
Do you not question the payout of the board of Avista and the condition of the finances of Hydro one?
Take some time and study the proposed "great" reduction of the monthly fees proposed for a number of years and then see what will happen after, rates increased to cover Hydro ones outstanding debt?
This subject should be given much more public coverage than now done and you would see how many people are against it Thank you for your consideration Dennis R Mader

Comment: If you approve this you're probably getting some sort of "gratuity". Exposure is all negative for Avista customers.

Comment: I can't understand why anyone who is not getting some sort of a "gratuity" would approve the proposed merger of Avista with Hydro One. Lots of downside exposure for Avista customers.

I am writing to express my concern re the sale of Avista Utilities to Hydro One, a Canadian company. I do not vote in favor of this sale. If we are going to "Make America Great Again", it will not be by selling American companies to foreign country companies. And because of the recent tariffs imposed on Canadian imports to the US and Canadian Prime Minister Trudeau's dislike of our President, how can the IPUC guarantee a good outcome for Avista customers?²

I realize 98% of Avista shareholders (mostly institutional investors) voted in favor of the sale; it seems the small user wishes have not been considered.

next -

I also do not believe that Hydro One stating jobs won't be lost and prices won't go up is a true statement. To my knowledge, no incoming company has ever kept their word on those two items.

Please review the letters of opposition in regard to this sale and consider them seriously when making your final decision.
